Discover Solome's Web Development World

Hi! My name is Solome Zewdu. I am passionate about web development and dedicated to my craft. With 1 year of experience as a front-end developer and a beginner in back-end development, I have acquired the skills and knowledge necessary to make your project a success. I enjoy every step of the process, from discussions to collaboration. My journey is driven by a love for programming and web development, and my goal is to make a meaningful impact through my work. On this site, you will find a showcase of my projects, insights into my creative process, and a glimpse into what inspires me.

Watch the roadmap I have followed

Education

- 2023 - Present: Self-Taught Web Development
Started learning programming through online tutorials and resources, focusing on HTML, CSS, and JavaScript. Participating in free courses to build foundational skills.
- 2023 - Present: Learning Web Development and Programming through Academic Programs at AAiT
Enrolled in the Software Engineering department, gaining hands-on coding experience.

Experience

- Personal Projects
Created simple websites to practice and improve skills in HTML, CSS, and JavaScript.
- Collaborative Learning
Worked with peers in online coding communities to solve coding challenges, share knowledge, and help each other grow as developers.

[Home](#)[About](#)[service](#)[portfolio](#)[contact](#)

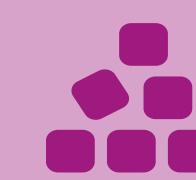

Frontend Development

I'm learning to create beautiful, responsive websites using HTML, CSS, and JavaScript. While still building my skills, I enjoy designing user-friendly interfaces and improving my understanding of web design fundamentals. Each project helps me grow as a frontend developer.

Backend Development

I'm exploring backend development with Python, Java, and SQL to build the logic and data systems that power websites. I enjoy learning how to manage servers, databases, and APIs while growing my ability to create secure and scalable systems.

Full-stack Development

I'm developing skills in both frontend and backend to create complete applications. By combining my knowledge of HTML, CSS, JavaScript, Python, and SQL, I aim to design user-friendly interfaces and efficient backend systems while continuing to learn and grow.
